ABOUT THE BOOK

In the face of a world undergoing a turbulent transformation, this thought-provoking novel offers a visionary perspective on the intersection of human reason and technology. As global tensions escalate and the boundaries between reality and virtuality blur, a courageous protagonist, TRANSITION KEEPER, embodies a quest for balance and harmony. Through the lens of a feminine reinterpretation of artificial intelligence, this book challenges the notion of abandoning reason and instead calls for a harmonious fusion of the two. A letter to the future generation, it envisions a path forward, where innate data-ists forge a new equilibrium, fostering hope for a more peaceful world. An alternative vision for our troubled times.

ABOUT THE AUTHOR

Ali Blank is the universe's pseudonym for the universal story. Born in Ukraine, lives in the West World, has a Ph.D., and is specialised in consulting, public relations, and media technology, specialising in business and politics. She has managed more than twenty election campaigns in Ukraine. She is an expert in mass communications and comments for Ukrainian and foreign media. She is the author of *Course of Events* and *Transition Keeper: Monologies of the New Babylon* books. Her last books raise questions on controlling artificial intelligence, the dual nature of people, and the ethics of power.
